

## ABOUT THE MOSS, AND WHAT ELSE TO DO WITH IT.

We have to admit that these little moss gardens were inspired by our friend and fellow gardener [Paul Little](#).

This may give you some ideas what to do with moss, we are still creating these and more variations are to come.

We just used shallow terra cotta dishes, usually used under large Containers, fill them with soil, mixed with a little pinebark mulch.

Then just lay on the moss and play maybe with and additional small plant, we use some babies of nippon lily, autumn fern, sweet flag or a maiden hair fern.

Have fun with it.

Diane & Wolfgang
